Securing  
a future  
for Devon's  
nocturnal  
wonder

What do Bats eat?

All UK bats eat  
insects

**DEVON  
GREATER  
HORSESHOE  
BAT PROJECT**

# Wildflowers and meadows are good because.....

- They provide food for all sorts of bugs
- Insects feed on the nectar of flowers and help to pollinate the plant
- The more insects you have, the easier it is for bats to find food

# Different types of wildflowers

Field Poppy

Corn Chamomile

Cornflower

Corn Marigold

Put the flowers together to create....

DEVON  
GREATER  
HORSESHOE  
BAT PROJECT

# Where can I grow wildflowers?

In a small pot or container

In a corner of your garden or school grounds

In a field

Bats – help  
them find their  
food by  
planting a ‘Bat  
Buffet’
